How will this objective be implemented?

- Providing financial support to the select project organizations.
- Maintaining close contacts and monitoring projects organizations.
- Supervising the financial support issued and the expenditure thereof as well as

Does your institution promote the interests of a specific target group?

The focus lies on education, healthcare and/or research within the Benelux and/or in developing countries and furthermore all that is related to the aforementioned, belonging to it and/or being conducive to it.

How will the foundation raise income?

The assets of the Foundation will be made up of grants and other contributions. Initially the contribution will come from the chairman through a 20 years donation pledge. This pledge should be sufficient for funding several project organizations. Therefore, the foundation does not intent to fundraise at the early stage.

How will the assets be managed?

The foundation plans on uses all its contribution on a year basis. The vast majority of the contributions will be given to the select project organizations. A small portion of the contributions will be used to administer the foundation (e.g. Website cost). This portion will stay under maximum 2% of the contributions. No remuneration will be paid to the directors for their work.

It will be ensured that no more assets are held by the Foundation than are necessary for the continuity of the planned activities on behalf of the purpose of the Foundation. At the end of each financial year the treasurer will draw up a balance sheet and a statement of income and expenditure for the financial year which has ended. Those documents will be approved and then then be made public via our website.
